TIP #1

When entering the amount of the check in the app, please do NOT add a $ sign, and it is not necessary to add .00 after you enter the dollar amount.

TIP #2

When taking pictures of the front and back of the check, please make sure you are taking the picture as a landscape/horizontal picture. Make sure to use a dark background, so all four corners of the check are viable.

TIP #3

No need to write anything on the back of the check, snap the front, then the back and select Submit Item and get an immediate confirmation when your item has been successfully submitted.

ANDROID TIP

On the Android app, please make sure to convert the image of the front and back of the check. The app will not allow you to continue to submit, if you do not convert the images.
